

Nuclear industrial cooperation of the UAE and Finland - seminar and networking

This seminar and discussion event is a part of the study visit in Finland where the UAE delegates will gain insight on the outage and maintenance practices, and on the industrial development, both essentially contributing to the safe, high performance and long-term operation of NPPs. Participants from Finland will gain information about the business opportunities and practicalities of the UAE nuclear market. This exchange promotes industrial cooperation between the countries. The seminar is organized by Business Finland in cooperation with FinNuclear.

Date: Tuesday 6 June 2023

Place: Business Finland office, Porkkalankatu 1, Helsinki

Program:

Moderator, Petri Laulajainen, Senior Advisor, Energy Advice Services, Global Growth, Business Finland

- | | |

Background:

UAE and Finland signed a memorandum of understanding on the cooperation in the field of energy in 2022. As the operator of the newly built Barakah nuclear power plant units, **Nawah Energy Company** is strengthening the industrial base for the operation and maintenance of nuclear power plants in the UAE. Finland, with over 40 years of experience in the use of nuclear power, can offer a range of expertise in order to support their pursuit.

Organized by:

**BUSINESS
FINLAND**
